

Denial of Service Mitigation

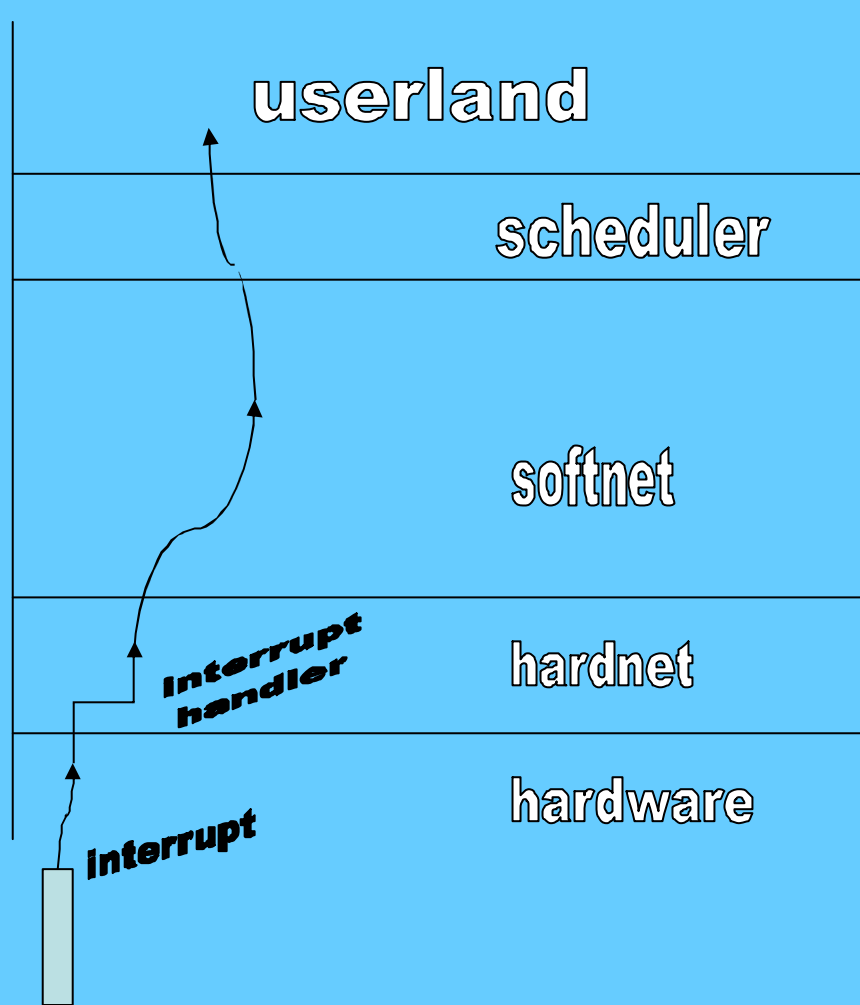

Less is more !

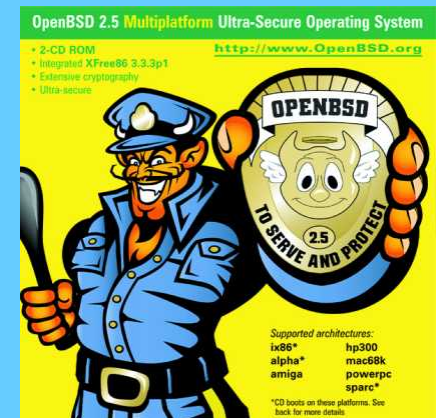

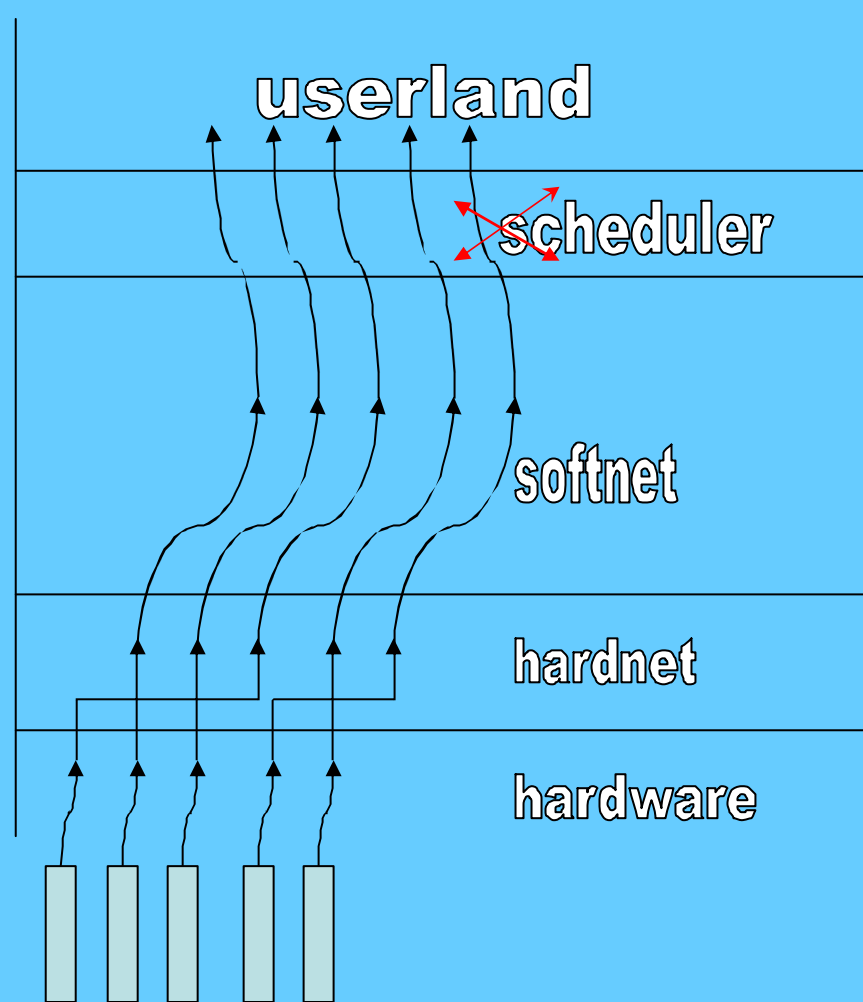

- Automatic Ring sizing

Previously

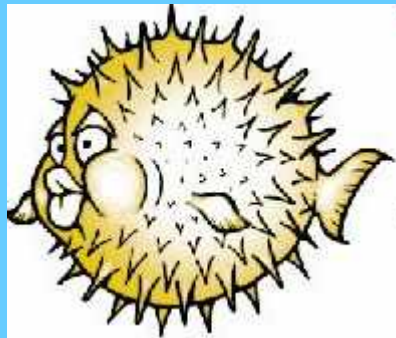

Problems

Advantages

- > 100 network drivers
- Significant modifications to the drivers
- Significant memory savings
- Functional livelock mitigation

Slowly working forward....

- armani also pointed out the same issue with my MCLGETI diff for xl(4). I've adapted bluhm's patch and it works fine here. Any feedback ?

<http://marc.info/?l=openbsd-tech&m=130090823215464&w=2>

What I've done: xl(4), dc(4), epic(4), stge(4) and tl(4)

Others: vr(4), re(4), em(4), bge(4), sk(4), sis(4)

Thanks to: Avinash Meeto (provided a gigabit switch), claudio jeker, Theo de raadt, David Gwynne, Jonathan Armani, Miod Vallat, Bryan, Tobias Ulmer, and many others

Any Questions ?
